Session 134: When peace appears within then peace will manifest outside

Original Question: Can you explain the human aspect of wanting to control and be controlled?

Summary: It is not possible for an individual to gain total control of the earth energies. When you can achieve the perception of the energies then you can observe the events in the harmonious state. You can be an observer and not interfere in the occurrence. The entities that were being channeled are aware of the physical energies. There was some conflict between the energies that were being channeled from Dr. Carlyle. Everything is now moving harmoniously.
